

2024 Election Results and the 2024 District Map

Mean Democratic Vote Share: 61.58 %

Median Democratic Vote Share: 63.08 %

Mean-Median Score: -1.5 %

Interpretation: Small Republican advantage (mean < median)

EFFICIENCY GAP

Total Democratic Wasted Votes: 3,064,992

Total Republican Wasted Votes: 4,433,524

Efficiency Gap: 9.13 %

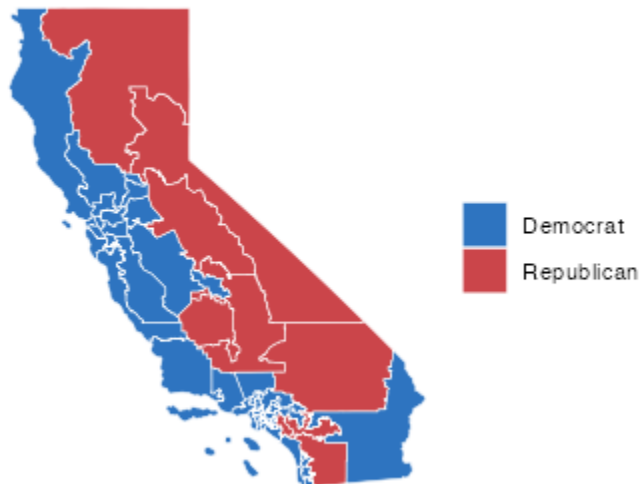

Interpretation: Republicans have an efficiency advantage (wasting fewer votes)

Won:

Democrats: 43 seats

Republicans: 9 seats

2024 Congressional Districts

2025 Theoretical Election Results and the Proposed 2025 District Map

MEAN-MEDIAN ANALYSIS

Mean Democratic Vote Share: 55.48 %

Median Democratic Vote Share: 56.05 %

Mean-Median Score: -0.57 %

EFFICIENCY GAP

Total Democratic Wasted Votes: 2,153,022

Total Republican Wasted Votes: 4,464,712

Efficiency Gap: 17.47 %

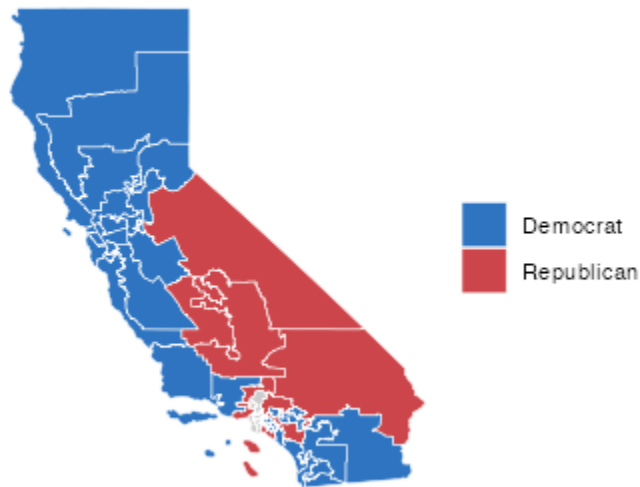

SEATS WON

Democrats: 41 seats

Republicans: 11 seats

Total Districts: 52

Proposed Districts

Maps

Methodology

Data Sources: 2024 votes from CA Statewide Database; 2024 districts from Census TIGER; proposed districts from AB 604.

Method: Area-weighted interpolation allocated precinct votes to new districts proportionally by geometric overlap, assuming uniform voter distribution.

Metrics: Mean-median measures vote packing ($\pm 2\%$ neutral); Efficiency gap measures wasted votes ($\pm 8\%$ threshold).

Caveats: Single metrics don't prove gerrymandering; geographic clustering affects results; projections assume stable voter preferences.
